

and Ischemia in Elderly Patients by Cardiopulmonary Exercise Testing*

*Paul Older, M.B., B.S.; Robert Smith, M.B., B.S.;
Peter Courtney, M.B., B.S.; and Rodney Hone, B.Appl.Sc.*

Major surgery in the elderly continues to have a high mortality rate. Preoperative myocardial ischemia is a known risk factor. Cardiac failure is also a risk factor, but is difficult

these, 1 patient died, giving a mortality rate of 0.8 percent ($p < 0.001$). A low AT associated with preoperative ischemia resulted in the death of 8 of 10 patients, a mortality rate of
