

- Pluralist and pragmatic research design and methods
- Evidence from four levels:
  - WMA
  - Village
  - Household
  - Individual
- Approaches to gather evidence:
  - Collection and review of documents and records
  - Structured survey with HH heads and wives
  - Semi-structured interviews
  - Discussions and observations

Collection and review of documents and records	WMA finances, rules, activities, and governance
Structured survey with HH heads and wives	BACI impact on wealth (HH) and livelihood strategies, costs-benefits, perceived impacts, governance indicators
Semi-structured interviews	Conflicts, process, inclusion, transparency, perceived impacts, etc.
Discussions and observations	As above

- Livelihood strategies through a participatory exercise
